In line with Xpax's continuous efforts in improving consumer experience, consumers can utilise unused Internet quota from their internet plan subscription via Xpax's newest feature -- *Data Rollover,* which allows consumers to bring forward their unused data, based on what is left from any of their previous Xpax Internet Plan or add-on subscription. To ensure internet quota gets rolled-over, Xpax consumers need to remain active on their plans via auto-renewal or re-purchase another plan before their existing plan expires.

Zalman Aefendy Zainal Abidin, Chief Marketing Officer of Celcom Axiata Berhad said Xpax is excited to offer the all-new Instagram Walla™ add-on for everyone to enjoy the best digital photo sharing experience.

"Our consumers can continue to remain up to date with their friends and family through their latest awesome photos within the digital space, worry-free from their data being depleted.

"As Celcom continues to enrich its consumers' digital experience, our consumers do not need to look elsewhere for a perfect plan that fits their desire to remain digitally awesome!" he said.
