**+ Add on**

**DIGITAL WORKFORCE**  
**数码业务**

Increase productivity by optimising your workforce's mobility

**Office 365**  
Work online or offline using any web browser on all smart devices with Microsoft's industry-standard suite of applications like Word, PowerPoint, Excel, Outlook, Skype, and more.

**VirtuExt™**  
Never miss another phone call. Enable office mobilisation by allowing your staff to work from wherever that's best for them, while being reachable by a single phone number.

**Cloud Secure**  
Hackproof all of your devices. That includes smartphones, computers, televisions, game consoles, and anything that's connected to the Celcom network. No installation needed.

**+ Add on**

**INNOVATIVE RETAIL**  
**创新零售**

Adopt new ways to perform transactions for greater customer satisfaction and business growth and keep track of cashflow

**mPOS**  
Expand your business quicker. Provide your customers extra convenience by turning your smart devices into a card payment terminal. Simply attach our card reader and monitor transactions on the app or merchant portal anytime, anywhere.

**Boost**  
Future-proof your transactions by adding e-wallet as a payment option. As our merchant, you get extra incentives and receive performance reports on one simple app. By using one of Malaysia's fastest-growing e-wallet app, you are able to reach out to an expansive customer base.

**+ Add on**

**SMART COMMUNICATION**  
**智能通讯**

Expand opportunities by connecting with other businesses, customers, and more

**OMNI Communication**  
Maximise engagement with your customers across popular chat apps, SMS, email, and push notifications. Customise targeted promos, ready to be blasted with just one click, wherever you are.

**+ Add on**

**INTERNET OF THINGS (IoT)**  
**物联网 (IoT)**

Connect every component of your business online to maximise asset utilisation for optimal operation efficiency.

**M2M (Machine-to-Machine) Connected Services**  
Connect your machines over wireless network with a SIM card to receive reports on activity and progress in real time. Applies to various utilities, including transportation, healthcare, security, and household appliances.
